## PREFACE.

This Catalogue of North American Mosses and Hepaticæ has been prepared as a check and exchange list, and a basis for arrangement of herbaria.

It is based upon the "Manual of Mosses of North America," by Leo Lesquereux and Thos. P. James, and the "Descriptive Catalog of the North American Hepaticæ, North of Mexico," by L. M. Underwood. It is thought unnecessary to give the distribution of the species, as that is given in these works.

At the suggestion of Prof. Underwood, the arrangement of Orders and Genera, as given in his Catalog, is reversed, that these may be placed in their proper relation to Mosses.

The following Mosses not given in the Manual will be found in the Addenda :

Hypnum occidentale, Sulliv. and Lesq

— *Botanical Gazette*, vol. 9, p. 195.

Hypnum Barberi, Renauld.

" serpens, L. var.

Barberi, Renauld.

— *American Naturalist*, vol. xvii., pp. 821-2.

Exchange of Mosses solicited.
